**DETAILED ACTION*****Claim Objections***

1. Claims 4-16 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-16 are not been further treated on the merits.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 1-3 recite broad recitation followed by "in particular . . .", which is the narrower statement of the range/limitation.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3 as far as they are definite, are rejected under 35 U.S.C. 103(a) as being unpatentable over WO03/029632 (Brendle et al. as evidenced by U.S. Pat. No. 6,974,119) in view of U.S. Pat. No. 4,089,505 (Anderle et al.). Brendle et al. disclose a reduction gearing of an electrically operated actuator to control gaseous or liquid volume comprising a reduction gearing (14a, 14b, and 12b), a primary gearing (14a), at least one drive motor (20), a secondary gearing (14b), an output drive (12b), wherein the gear modules (14a, 14b) are interchangeable (the gearing could be possible switched and would still work correctly) but lacks a self lock torque limiting coupling. Anderle et al. teach an electrically operated actuator or drive motor (11) and a self lock torque limiting coupling (57). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the reduction gearing of Brendle et al. by adding a torque limiting coupling as taught by Anderle et al. in order to prevent a dangerous amount of torque being applied to the valve member.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Pat. No. 7,055,795 (Lay) discloses a reduction gearing in a valve assembly.

U.S. Pat. No. RE39,257 (Kamimura et al.) disclose a reduction gearing in a valve assembly.

Art Unit: 3753
